

Bash Scripting for Hackers (Educational)

Hacking-zone community — Creator: Pirmaxmatov Og'abek

Attention: ONLY ACADEMIC PURPOSES. Use these materials in isolated lab environments with permission.

Purpose

This guide shows practical Bash scripting patterns for automation, monitoring, and defensive tooling. Example scripts are intentionally non-destructive.

Example Patterns

- Log rotation and compression scripts (safe).
- Automated system info collection for triage.
- Simple port/service availability checks (non-intrusive).

Sample Safe Script

Example: a script that collects uname, running processes list, and recent syslog entries into a timestamped report for incident triage.
