

Kali Linux Customization Guide

Hacking-zone community — Creator: Pirmaxmatov Og'abek

Attention: ONLY ACADEMIC PURPOSES. Use these materials in isolated lab environments with permission.

Customization Overview

Customize Kali for productivity: user profiles, custom dotfiles, Zsh with Oh-My-Zsh, and toolsets by task. Keep a non-root user for regular work.

Appearance & Efficiency

- Set dark terminal themes, configure tmux, and create aliases for frequent commands.
- Use package lists to automate environment setup (scriptable).

Safety Tips

Do not run a constantly-root shell; use sudo selectively. Snapshot VMs before major changes.
