

Linux Forensics & Incident Response

Hacking-zone community — Creator: Pirmaxmatov Og'abek

Attention: ONLY ACADEMIC PURPOSES. Use these materials in isolated lab environments with permission.

Preparation

Establish IR playbooks, forensic acquisition procedures, and maintain isolated forensic workstations.

Acquisition

- Use dd or dc3dd for disk images, capture memory with LiME for Linux, and collect volatile data (ps, ss, netstat, open files).

Analysis & Reporting

Correlate logs, timeline of events, and preserve chain-of-custody. Provide clear remediation and follow-up checks.
