Attention: ONLY ACADEMIC PURPOSES. Use materials in isolated lab environments with permission.

Introduction

This methodology outlines a legal, ethical and structured approach to network penetration testing. Obtain written authorization before testing.

Phases

- Reconnaissance: passive and active discovery.
- Scanning: port scanning and service enumeration.
- Exploitation: only in authorized lab environments.
- Post-exploitation: evidence collection and cleanup.
- Reporting: provide clear remediation guidance.

Deliverables

A professional report with findings, PoC (screenshots), remediation steps, and retest plan.
