

Cryptography Implementation Guide

Hacking-zone community — Creator: Pirmaxmatov Og'abek

Attention: ONLY ACADEMIC PURPOSES. For educational and authorized use only.

Overview

Guidance for implementing cryptography correctly: use established libraries, avoid home-brew algorithms, and manage keys securely.

Common Pitfalls

- Using insecure random sources
- Improper IV reuse with AES modes
- Rolling your own crypto instead of proven libraries

Deployment

Use authenticated encryption (AEAD), enforce TLS, and ensure key rotation and storage policies.
