Case Study 1: Spearphishing Campaign (summary)

Summary of a targeted spearphishing campaign (high-level, non-actionable): attacker used OSINT to craft personalized emails leading to credential theft; detection relied on anomaly-based authentication alerts.

Case Study 2: Insider Pretexting (summary)

An insider was manipulated via social approaches; mitigation included stricter verification and faster reporting channels.

Lessons Learned

Implement multi-factor authentication, reduce excessive privilege, and ensure easy reporting for suspicious contacts.
