

Social Engineering Framework

Hacking-zone community — Creator: Pirmaxmatov Og'abek

Attention: ONLY ACADEMIC PURPOSES. Use these materials for awareness and defensive training in authorized environments.

Overview

A structured framework to understand and defend against social engineering attacks. Focuses on attacker goals, common vectors, and defense layers.

Attack Vectors

- Phishing and spearphishing via email and web links.
- Pretexting and impersonation via phone or social platforms.
- Physical methods: tailgating and baiting.

Defensive Controls

Combine technical controls (email filtering, DMARC, URL scanning) with human controls (training, policies, verification procedures).
